## International GCSE Science (Single Award) – Physics Equation List

You are not permitted to take this notice into the examination.  
A version of this equation list will be included with the May–June 2025 question papers. This document is valid if downloaded from the [Pearson Qualifications website](https://www.pearsonqualifications.com).

## 1. Forces and Motion

$$\text{average speed} = \frac{\text{distance moved}}{\text{time taken}}$$

$$\text{acceleration} = \frac{\text{change in velocity}}{\text{time taken}} \quad a = \frac{(v-u)}{t}$$

$$\text{force} = \text{mass} \times \text{acceleration} \quad F = m \times a$$

$$\text{weight} = \text{mass} \times \text{gravitational field strength} \quad W = m \times g$$

## 2. Electricity

$$\text{power} = \text{current} \times \text{voltage} \quad P = I \times V$$

$$\text{voltage} = \text{current} \times \text{resistance} \quad V = I \times R$$

## 3. Waves

$$\text{wave speed} = \text{frequency} \times \text{wavelength} \quad v = f \times \lambda$$

## 4. Energy resources and energy transfers

$$\text{efficiency} = \frac{\text{useful energy output}}{\text{total energy output}} \times 100\%$$

$$\text{work done} = \text{force} \times \text{distance moved} \quad W = F \times d$$

$$\text{gravitational potential energy} = \text{mass} \times \text{gravitational field strength} \times \text{height}$$

$$GPE = m \times g \times h$$

$$\text{kinetic energy} = \frac{1}{2} \times \text{mass} \times \text{speed}^2 \quad KE = \frac{1}{2} \times m \times v^2$$

$$\text{power} = \frac{\text{work done}}{\text{time taken}} \quad P = \frac{W}{t}$$

## 5. Solids, liquids and gases

$$\text{pressure} = \frac{\text{force}}{\text{area}} \quad p = \frac{F}{A}$$
